

SUSTAINABILITY POLICY

Energy

Italcementi Group acknowledges the need to move toward a low-carbon economy while alleviating social impacts and is committed to playing its part in developing practical and feasible solutions, together with governments and other responsible players in the building material sector.

In this respect, the Group promotes sectoral and local actions to provide faster and more effective large-scale responses to climate change. Moreover, the Group shows a potential for achieving a cooperative 20% cut in current absolute carbon emissions by 2050 across the entire building material sector.

Italcementi Group

- 1** Takes action on energy conservation and efficiency, both in its operations and the supply chain, while designing products suitable to support energy efficiency in buildings and sustainable construction.
- 2** Sets public targets for reducing carbon footprint of operations and products, aiming at achieving results at or beyond the expectations of the international agenda and in line with the commitments made within the building material sector.
- 3** Invests in projects aimed at increasing the use of carbon neutral alternative fuels and raw materials and at exploring options for downstream carbon valorisation.
- 4** Promotes energy efficiency initiatives across the Group and moves towards renewable sources of electricity.
- 5** Engages all employees in reducing their energy and carbon footprint and in switching to sustainable mobility, while preserving reasonable well-being and comfort.
